# MODERN STAINLESS HARDWARE

**①** Turn off electrical power to existing doorbell.
Remove old doorbell button.
Use template provided to mark hole positions.
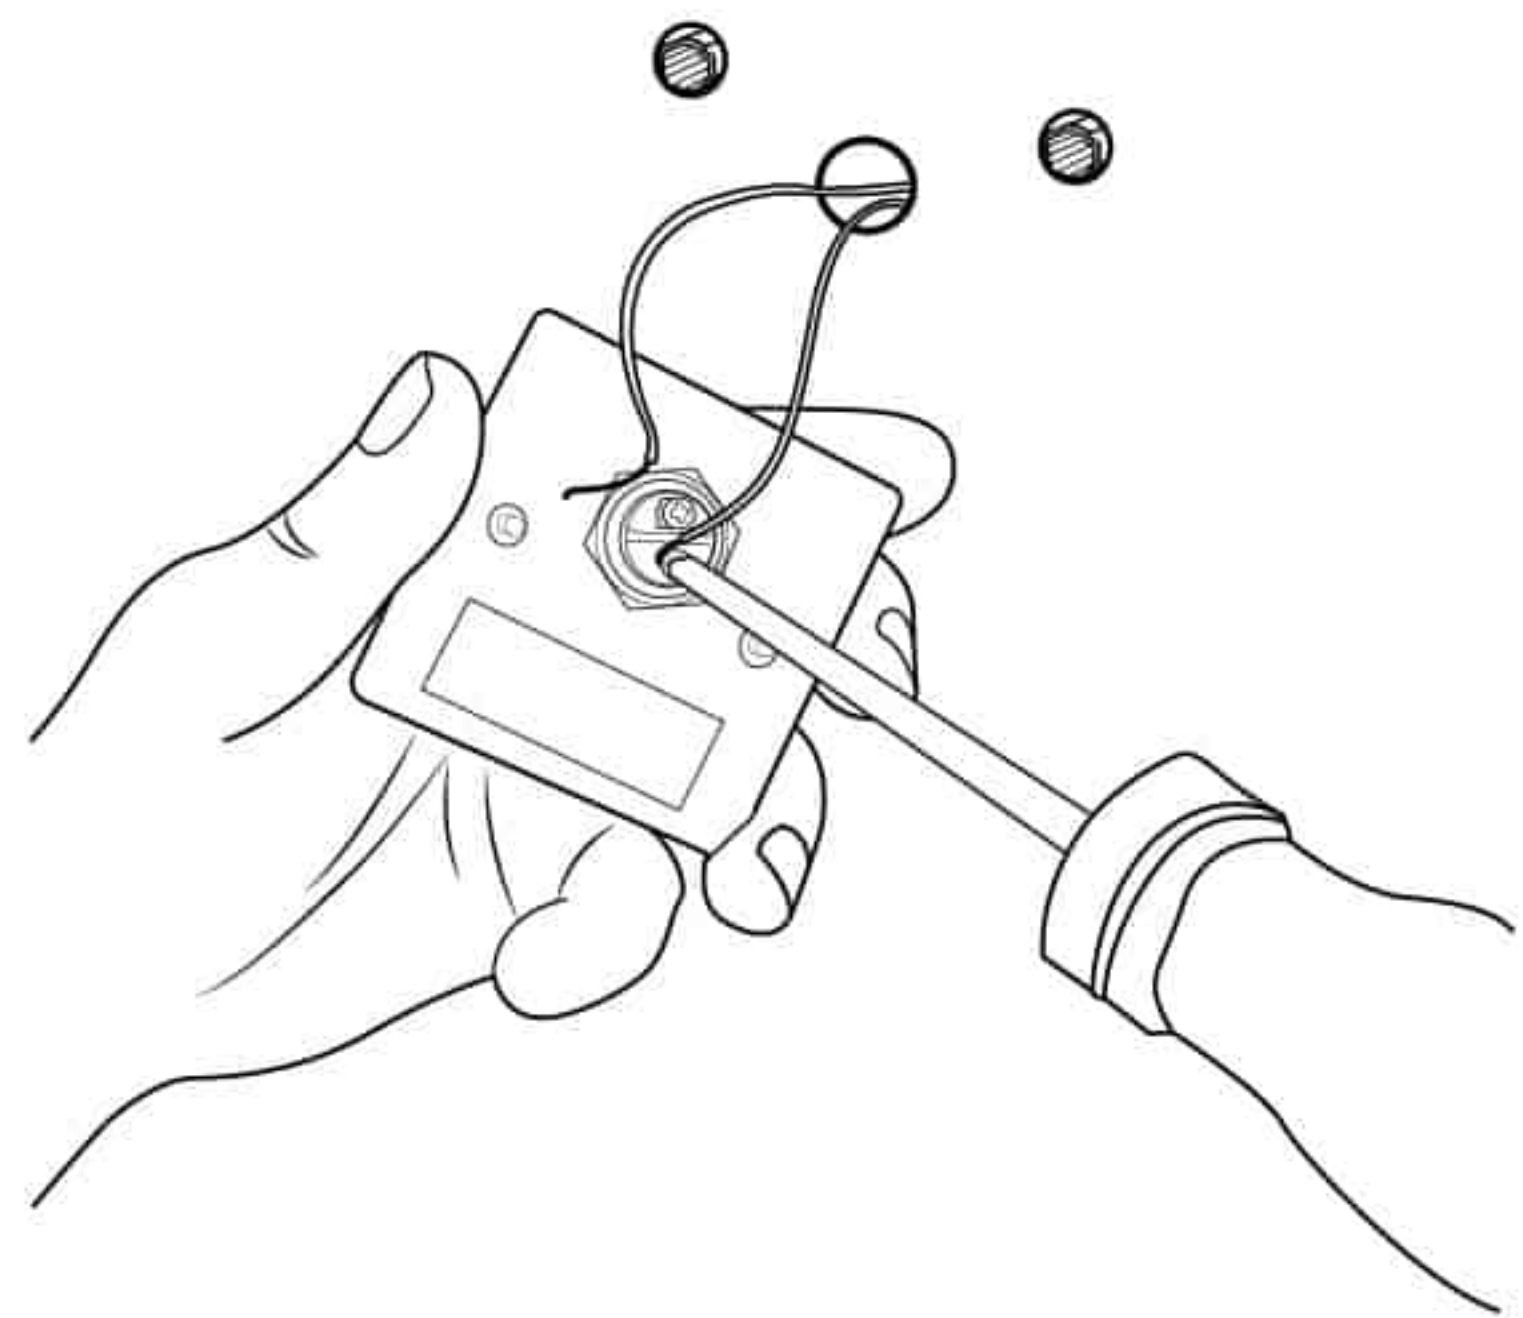

**②** Drill holes using the appropriate drill bit for your surface material

**③** Insert plastic anchors into small holes

④ Attach wires to the 2 screw terminals on pushbutton

⑤ Push posts on back of doorbell into the plastic anchors

⑥ Using a soft cloth to protect the surface of the doorbell, GENTLY tap the posts into the plastic anchors, alternating sides, using a plastic or rubber mallet until doorbell is flat against the mounting surface. DO NOT HIT THE CENTER PUSHBUTTON WITH THE MALLET.
